Vsebinska raziskava**Ključne besede ADP:**

epidemija, cepljenje, SARS-CoV-2, covid-19, religija, politična usmerjenost

Ključne besede ELSST:

BAKTERIJSKE IN VIRUSNE BOLEZNI, COVID-19, CEPLJENJE, RELIGIJA, VIR INFORMACIJ

Vsebinska področja CESSDA:

Zdravila in zdravljenje
Množični mediji

Vsebinsko področja CERIF:

Družbeni problemi in blagostanje, socialno skrbstvo

Vsebinska področja ADP:

PRESEJALNO VPRAŠANJE
KAKOVOST ŽIVLJENJA V ČASU PANDEMIJE
LESTVICA DEPRESIVNOSTI, ANKSIOZNOSTI IN STRESA (DASS21)
LESTVICA ZA PREVERJANJE ODNOSA DO CEPLJENJA (VAX)
VIRI INFORMACIJ O CEPLJENJU
RELIGIOZNOST
DEMOGRAFIJA

Povzetek:

Gre za podatke raziskave o počutju in odnosu do cepljenja med pandemijo COVID-19, ki jo je izvedla skupina neodvisnih raziskovalcev z različnih institucij na Poljskem, v Romuniji in Sloveniji. Namen študije je bil v proučevanih državah ugotoviti počutje in odnos prebivalstva do cepljenja ter analizirati, kako sta povezana z različnimi socio-demografskimi značilnostmi, vključno z religioznostjo in politično usmerjenostjo. Ker je raziskava potekala v treh državah je bilo za pripravo skupne podatkovne datoteke potrebnih nekaj prilagoditev in usklajevanj. Predlagamo, da si pred uporabo podatkov preberete spremna gradiva z dodatnimi pojasnili. Datoteka je dostopna v dveh verzijah tj. kot SUF verzija (dostop pod posebnimi pogoji), ki je delno anonimizirana in namenjena uporabi le v raziskovalne namene in kot PUF verzija (standardni dostop), ki je anonimizirana in namenjena splošni rabi v raziskovanju. Odgovori na odprto vprašanje so dostopni v dodatni datoteki (*xlsx format), pri čemer gre le za odgovore slovenskih respondentov.

Abstract:

ni podatka

Metodologija

Časovno pokritje:

april 2021

Čas zbiranja podatkov:

16. april 2021 - 27. april 2021

Čas izdelave:

2021-10

Država:

Poljska, Romunija, Slovenija

Geografsko pokritje:

Poljska, Romunija in Slovenija

Najmanjša geografska enota:

Država

Občina (Slovenija)

Enota za analizo:

Posameznik

Populacija:

Polnoletni prebivalci, ki na dan anketiranja niso bili cepljeni proti COVID-19. Ker pa je bila v nekaterih državah v nagovoru vprašalnika opredeljena starost 16 let in več, lahko pri starosti respondentov pride do odstopanj navzdol.

Vrsta podatkov:

Številski

Izključeni:

Osebe, ki so bile na dan anketiranja cepljene proti COVID-19 z vsaj enim odmerkom.

Zbiranje podatkov je opravil:

BIOSTAT - BIOSTAT (Poljska)

UORADEA - Universitatea din Oradea = Univerza v Oradei (Romunija)

VALICON - Valicon, trženjsko svetovanje in raziskave d.o.o (Slovenija)

Časovna opredelitev podatkov:

Presečno

Pogostost zbiranja podatkov:

Enkratno zbiranje podatkov

Tip vzorca:

Mešano verjetnostno in neverjetnostno

Neverjetnostno: priložnostno

Neverjetnostno: kvotno

Za Poljsko in Slovenijo sta bila uporabljena reprezentativna spletna panela, ki temeljita na verjetnostnem vzorčenju iz registra prebivalstva (Local Data Bank of the Central Statistical Office - PL in SURS - SI). Zbiranje v Romuniji je bilo povsem priložnostno, po principu snežne kepe z uporabo socialnih omrežij in drugih kanalov, pri čemer je pomagala skupina študentov.

Način zbiranja podatkov:

Vprašalnik za samoizpolnjevanje: spletni

Uporabljeni inštrument:

Strukturiran vprašalnik

Opis zbiranja podatkov:

Na Poljskem in v Sloveniji (JazVem) je bila anketa izvedena preko spletnega panela, medtem, ko je bila v Romuniji izvedena s pomočjo programske opreme Google Forms. Z reševanjem ankete je pričelo 3952 oseb (2101 na Poljskem, 428 v Romuniji in 1423 v Sloveniji), vendar je bilo od teh 2211 (1793 na Poljskem, 37 v Romuniji in 381 v Sloveniji) takih, ki so že bili cepljeni ali so presegli starostno in spolno kvoto (na Poljskem) ali pa niso odgovorili na presejalno vprašanje. Z izpolnjevanjem ankete je tako nadaljevalo 1741 oseb (308 na Poljskem, 391 v Romuniji in 1042 v Sloveniji), ki v času anketiranja niso bile cepljene. Od teh je izpolnjevanje ankete predčasno prekinilo 17 oseb (8 iz Poljske, 2 iz Romunije in 7 iz Slovenije), končno število vseh izpolnjenih anket je tako 1724 (300 iz Poljske, 389 iz Romunije in 1035 iz Slovenije).

Ukrep za zmanjševanje manjkajočih podatkov:

Respondenti v Sloveniji in Romuniji za sodelovanje v anketi niso prejeli nobenih spodbud, medtem, ko so respondenti na Poljskem za sodelovanje prejeli 40 točk, ki jih je možno pretvoriti v denar (za zbranih 1000 točk prejmejo 50 PLN).

Uteževanje:

Podatkovna datoteka zajema več uteži (SI_wght, ga_wght, cntry_w, w_tot), pri čemer se spremenljivke nahajajo na koncu podatkovne datoteke. Bistveni sta uteži SI_wght, ki je izračunana glede na spol, starost, izobrazbo in regijo in se uporablja le za analizo podatkov za Slovenijo ter ga_wght, ki je poststratifikacijska utež, izračunana glede na spol in starost in se uporablja za primerjavo deležev med državami. Več informacij o izračunu in uporabi uteži je navedenih v spremnem gradivu.

Očiščenje podatkov:

Podatki so očiščeni.

Preverjena je bila logična konsistentnost. Pri združevanju podatkovnih datotek so bila potrebna določena rekodiranja in usklajevanja.

Stopnja sodelovanja:

Stopnjo sodelovanja je mogoče izračunati le za Slovenijo, saj za preostali državi število poslanih vabil ni znano. V Sloveniji je bilo poslanih 3143 vabil, anketo pa je končalo 1035 respondentov, kar pomeni 33 % stopnjo sodelovanja.

Uvrstitev raziskave po pomembnosti:

8 - teoretsko ali praktično pomembne raziskave, zapolnjujejo raziskovalno praznino ali imajo široko uporabnost za več praktičnih problemov, imajo dolgoročno vrednost za znanost

Dostop do podatkov**Mesto:**

Arhiv družboslovnih podatkov

Velikost zbirke:

2 podatkovni datoteki.
